

passion for sports grounds

## Dear customers,

we never come to the FSB empty-handed. Not this time either, which is why we can surprise you with some new products for everything to do with Track & Turf that will be of use to you.

We have compiled the most **important innovations** for you and will present them to you here in note form.

### New products

SMG will present these new products at FSB 2021 in Cologne:

#### » **StructurMatic S130D**

With this new version of our spraying machine, you can conveniently process all structural spray coatings and solvent-based, solvent-free and aqueous PU dispersions used in sports surface construction.

#### » **ClearMatic CM1800**

Mobile system for the treatment, filtration and sludge dewatering of dirty water when cleaning synthetic sports surfaces.

#### » **BollerMatic BM1000**

Multifunctional platform-trailer with lawn tires for tough continuous use on the construction site. Thanks to its modular design, it can be expanded as required with optional accessories.

#### » **TurfBoy TB1**

Ride-on machine with proven SMG technology for the maintenance of artificial turf, equipped with a tow brush and trailer coupling at the rear.

#### » **Triangular brush DB1000F**

Light, robust and foldable triangular brush with weatherproof plastic body for efficient towing of synthetic turf.

#### » **Ball ramp Premium**

The foldable ball ramp measures the ball rolling behavior and the ball bounce height for football and hockey. With a remote release that can be mounted without tools for measuring the height of the ball jump and a foldable measuring rod for determining the course of the ball.

#### » **TurfTest TT200**

The measuring tool precisely determines the fill level of filling material in artificial turf and the total and free-standing fiber length of the artificial turf.

#### » **Turf TestSet**

Tool set for the exact measurement of artificial turf properties: filling height of filling material in artificial turf, total and free-standing fiber length of the artificial turf, ball roll behavior and ball bounce height.

#### » **Decompactor DC1000**

Towed device on lawn / communal tractors for loosening infilled artificial turf. Areas of application are e.g. long-pile football turf and short-pile tennis turf.

### More Innovations

you can look forward to:

#### » **Website updates with customer login**

Ask us, challenge us, we look forward to it!

#### » **AR technology**

The future topic of "Augmented Reality" (AR), in English called "Augmented Reality", is already present for us. The deceptively realistic images of the real machine world from SMG give mechanic teams useful information about details of technical components that need to be repaired with digital application scenarios created on the computer. First applications live at the fair.

#### » **Trace & Track**

With this option, we offer shipment tracking. The exact digital documentation and tracking from the start with us to delivery to you provides information about the current status of production and the current location of the ordered machine.

If you want to visit us at the fair, please let us know your preferred date so that we can take enough time for you.
