## MATERIAL DIVIDER

NOW AVAILABLE FOR THE PLANOMATIC SERIES

### Dear customers,

NEW MATERIAL DIVIDER: FOR IMPROVED MATERIAL FLOW.

**With our new material divider, a swiveling and height-adjustable guide plate, you can achieve an improved material flow with your PlanoMatic.**

Now available for all types of the PlanoMatic series. Upgrade your paving machine and improve the material supply on the screed – for an even more homogeneous compaction of the synthetic sports surface – across the entire working width.

The material divider is primarily attached directly to the screed bar. Optionally, two (1x on the left, 1x on the right side for more material in the corners) can also be mounted there. Likewise, the material divider can also be attached to the pre-strike-off rail as a guide plate for material when paving narrower tracks.

If you are interested in the new material divider, article number 6235220, we look forward to your inquiry.
